SUMMARY

I am a full stack engineer with experience working with Amazon Web Services. I have spent years building software using Node/JavaScript/Typescript, React/Redux, Ruby, HTML/CSS, SQL.

EXPERIENCE

Walmart Labs
Senior Software Engineer   Portland, OR   Dec 2020 - Present
Software Engineer III   March 2019 - Dec 2020
- Developed/supported a back end service to facilitate customer cc applications
- Built the public-facing landing page used on desktop and mobile for the Walmart Credit Card initiative
- Re-architected application running on in-store order check-in devices to increase uptime and simplify deployments

BAM! (https://www.bam-lambda.com/)
Co-creator, Engineer   Portland, OR   Oct 2018 - Present
- Co-created a serverless framework using Node.js and Amazon Web Services (AWS), engineered to be at least 55% faster than similar applications
- Presented tech talks about BAM! on January 10th, 2019 at the PDXNode Meetup and also on January 23rd, 2019 at the Portland JavaScript Admirers Meetup
- Built the website for BAM! using the framework, which contains a detailed case study

Freelance Full Stack Web Developer
Software Engineer   Portland, OR   2015 - 2019
- Square Sales data aggregator: aggregator of Square sales data build in Node.js
- Doodles Academy website: Ruby on Rails application providing a portal for content creation of art curricula, which can be viewed within the Doodles Academy website

Doodles Academy
Board Member   Portland, OR   Dec 2015 - Dec 2020
- Served on the board of directors of this non-profit, dedicated to expanding access to high-quality arts education for children

Stumptown Coffee Roasters
General Manager of Retail, National   Portland, OR   Sept 2012 - Aug 2018
- Rebuilt management teams at each of ten cafes across the country and mentored each team in management tactics and systems deployment
- Opened new stores in NYC, LA, New Orleans, and Chicago, contributing to both design and execution, achieved growth by as much as 80% from initial revenue
